01 Intro

Over the past few years, cryptocurrencies proved to be the fastest growing asset class and offered phenomenal rewards for those who decided to invest. Long term investors, as well as day traders, benefit from the unique opportunities offered by the most promising market we have ever seen.

Source: <Blockchain Partners>

However, investments into cryptocurrencies require time, specific knowledge, analytical skills, as well as professional tools to be successful. The difficulty is the main reason why most people simply miss tremendous opportunities offered by a booming market. There are different cryptocurrency exchanges that can offer various types of cryptocurrencies and have different terms, policies, payment methods, and fees. Exchanges also differ on aspects such as security, user-friendliness, functionality, and design.

01 Intro

These factors can all play a significant part when choosing the most suitable exchange. Talks over regulation of digital currencies and crypto exchanges are a way to help the market become healthier and more transparent.

What are the biggest problems that cryptocurrency traders see in currently available exchanges?

Source: <Statista>

02 Problems

With the growing market of cryptocurrency, more platforms are introduced to the industry. However, the market isn't entirely perfect. There are still a number of on-going problems in the market and the trading platforms.

1. Investor Opportunities

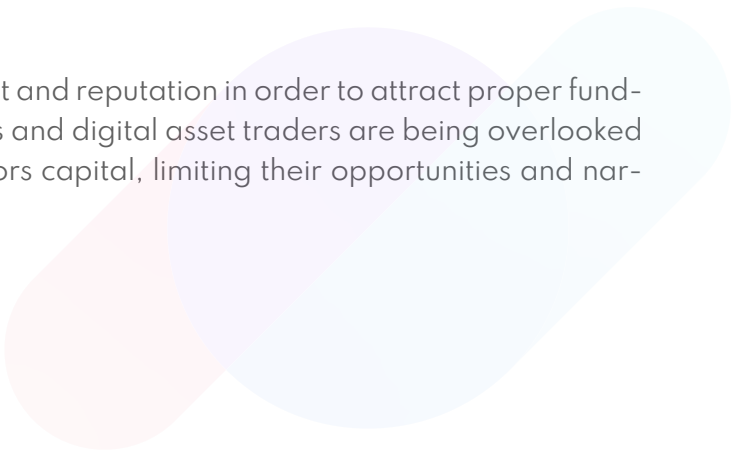

One of the biggest problems in cryptocurrency is the opportunity itself. When someone tries to make an investment in digital assets, he or she can be easily lost due to different rules and regulations found in multiple exchanges. The process often requires a lengthy verification process as well, and most investors easily give up at this point. Another problem is volatility, which can negatively affect the overall trading result of any inexperienced private investor. The new investors have so much to learn and experience that most of the time, only the experienced digital asset traders are in the best position to fully benefit from arising opportunities offered in the blockchain revolution.

For these reasons, investors sometimes choose to trust a private crypto trader or a fund, in order to gain profit in newly established markets. However, such decisions can be very risky due to lack of regulations and the high possibility of fraud in unverified environments

2. Trader Problems

Digital asset traders deal with equally challenging problems, which include launching a personal fund requires technical knowledge, programming skills, legal paperwork as well as marketing costs and other expenses. Since only a several digital asset funds have gained the reputation necessary for backing, private crypto traders and newly established funds tend to look for investors in online forums, social networks or amongst their friends.

It takes many years of effort to build trust and reputation in order to attract proper funding. As a result, many successful traders and digital asset traders are being overlooked and end up having no access to investors capital, limiting their opportunities and narrowing earnings potential.

02 Problems

3. The Traditional Asset Management Problem

The traditional asset management industry has been plagued with multiple issues including scams and corruptions since its inception. Unethical and illegal manipulations are often found among asset managers with a large sum of money at their disposal, Ponzi schemes, and their sweeping techniques are some of the common allegations faced by the industry. The industry has developed deep-rooted problems including mutual mistrust, unethical practices, scamming, and below-the-surface deals.

Trusting even professional asset managers in traditional markets can sometimes lead to problematic results. Stories of asset managers making certain trades just to increase their commission and drive up the fees to their investors are just the beginning when it comes to the level of dishonest activity when it comes to investing other's money. Every year, thousands of licensed traders are found guilty of insider trading, fraud, or scamming hard-working investors.

The biggest barriers to blockchain adoption

03 Background

To solve the problems listed above, we have decided to create a cryptocurrency trading platform of our own called 2GATHER. The name has two meanings: 'to-gather' and 'together'.

2GATHER is a platform we plan to provide for investors and cryptocurrency traders who are looking to utilize the most advanced trading tools and technology, as well as the combined wisdom of the community in order to achieve maximum returns in cryptocurrency markets.

2GATHER will be one of the leading cryptocurrency market investment management platforms with its different operation styles from the existing traditional investment structure. Its infrastructure will have three main benefits including:

- 2GATHER peer-2-peer Asset Platform
- 2GATHER 2Go Portal
- Liquidity aggregation / Algorithmic trading

04 Platform Overview

1. 2GATHER peer-2-peer Asset Platform

The 2GATHER peer-2-peer Asset Platform is the essence and core of our infrastructure. By implementing the successful peer-2-peer business model, the investors can easily browse through our trading models provided by professional traders and choose to “follow” whomever they wish to match their goals. All users can get a clear picture of the current and past performances of each trading model.

The 2GATHER platform does not allocate the money to anyone but rather implement the person’s own decision. At the same time, the platform automatically replicates all the trading activity of a chosen model directly into the investors’ accounts at 2GATHER. This action provides a unique peer-2-peer experience along with the safety of funds for both investors and traders. The 2GATHER platform is the ultimate venue where successful digital asset traders meet new investors, in a transparent, safe and efficient peer-2-peer investment environment.

Investors from all around the world can compare the performance of hundreds of successful cryptocurrency traders at any time and choose to mirror their trades automatically to their account. While traders benefit from success fees generated by profitable trading, investors can relax, knowing that their funds are following the successful and professional model of an industry.

By pairing the peer-2-peer business model and the cryptocurrency investment industry, 2GATHER offers a great opportunity to utilize the wisdom of experienced traders in order to achieve positive trading results securely.

2. 2Go Portal

2GATHER strongly believes in the importance of education when it comes to cryptocurrency. With the rapidly changing technology world, the 2GATHER team feels the necessity to stay alarmed. This also means it’s our job to educate the platform users, as we are offering them a vehicle to invest their money.

While investing in cryptocurrency is always a risky endeavour, there are certainly plenty of rewards to be gained as well, and that’s why we believe offering a large portal for our users to grow their knowledge of the crypto industry is very important.

04 Platform Overview

2Go Portal is the most complete educational resource and knowledge base built by traders for users. It features the latest market news, unique content created by leading crypto experts aimed at educating the community, sharing trading ideas and discussing latest market developments.

It will also include Crypto Trading 101, explaining the essentials of cryptocurrency investing, as well as video tutorials to help new investors. For experienced traders, advanced trading tutorials, strategies, and technical analysis from industry professionals will be included for their knowledge. There will also be a community dashboard where investors and traders can freely communicate with each other for information. With our 2Go Portal, the users can not only get knowledge and information, but also feel included and accepted by the community. We plan to have the 2Go Portal become the largest, community-oriented and continuously growing knowledge resource for investors.

3. Liquidity aggregation / Algorithmic trading

In the future, 2GATHER team is planning to aggregate liquidity from top cryptocurrency exchanges, This will allow all users to benefit from trades executing at the best possible rates. Such offerings, previously available only for institutional clients, provide internal liquidity with significantly reduced pricing on all trading activities occurring on the 2GATHER platform. These functions are currently still in development and we plan to provide the following expansion in the near future.

Such future developments will include:

- Making all cryptocurrencies available on one platform
- Providing the best prices for execution
- Combination of liquidity to offer less slippage, thinner spreads and ability to execute larger trades at once.
- Improved latency and reduced execution costs
- Quotes from multiple exchanges provide the ability to develop algorithmic trading strategies

Aggregated liquidity will offer 2GATHER members access to top crypto-exchanges and trade all possible coins from one single account.

04 Platform Overview

In the near future, we plan to provide our users with the following:

- Trade the widest selection of cryptocurrencies
- Access quotes from top exchanges through a single account (combined market depth)
- Access to all necessary information about crypto
- Access to the most advanced charting software
- Access to market sentiment, data and analysis
- Earn success fees apart from trading profits by allowing investors to copy trades, through the p2p asset platform.
- Build a full-scale trading career within one single platform
- Generate detailed financial reports which will be aligned with regulations

The 2GATHER trading platform is an advanced trading platform, adapted to the needs of traders using various strategies ranging from day trading and spread trading, to long term investments.

Backed by a strong team of industry professionals, 2GATHER is on a clear path to become an ultimate solution for investors and cryptocurrency traders. It will cover every aspect related to cryptocurrency trading, from education, market overview and trading ideas to the unique concept of p2p asset trading, liquidity aggregation and ultimately the most advanced trading station ever.

05 2GATHER Ecosystem

1. For Investors

The 2GATHER platform allows everyday investors to search and compare the performance of hundreds of proven cryptocurrency traders and replicate their trading activity automatically.

After an investor decides to “follow” the most suitable strategy - the system will automatically synchronize all trading activity from the chosen investing model into their segregated account at 2GATHER, providing the convenience of peer-2-peer asset trading along with the safety of funds.

Each investor can diversify their investments by following up to 20 different models (traders) at the same time. Such diversification allows investors to uniquely position themselves to record gains through multiple crypto trading strategies and protect themselves against massive losses in any single cryptocurrency. More importantly, investors are in total control - they can start or finish the following whenever they want.

2. For Traders

The 2GATHER platform helps investing talents bring their trading results in front of the public and compete with other traders in an unbiased environment. Any trader is free to act as a digital asset trader and grow their revenue by earning success fees. The more successful they are, the more followers they will acquire and the more money they'll make from profitable trading.

A user can easily decide to become a trader by linking an existing trading account at an external cryptocurrency exchange through an API. From this moment, all trading activity will be recorded in the model and the trader doesn't need to do anything else - just continue trading in the comfort of his personal account.

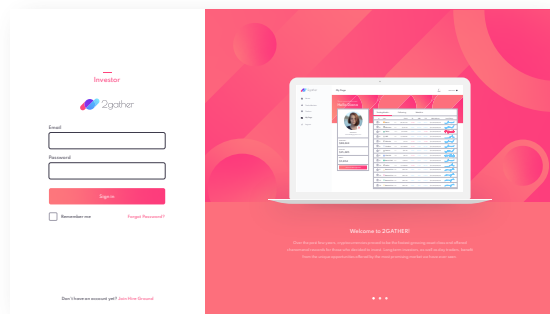

Later, the trader will be able to decide whether he wants to “list” his model at the 2GATHER platform and make it visible for investors instantly or keep it private for a while to build a solid track record first

05 2GATHER Ecosystem

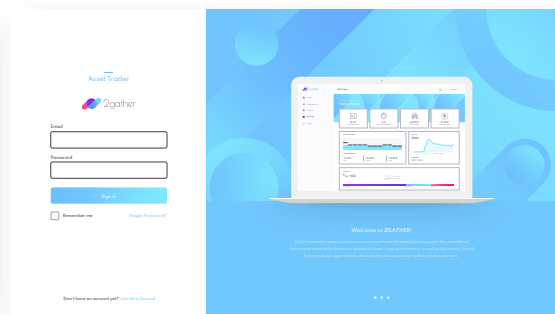

3. 2GATHER in 4 simple steps

1. Join: Register at 2GATHER through a simple procedure
2. Find top traders: Compare the performance of hundreds of successful model traders and find the one or many matching your goals.
3. Follow: Once you find the strategy or strategies you wish to follow, simply click “Follow”. You will be asked to specify the percentage of the funds you want to allocate to the model. The amounts for the replicated trades will be calculated proportionally.
4. Monitor and control: Now, you’re good to go. You can relax since all trades from now on will be replicated automatically. Most importantly – you are in control. You can manage your portfolio by following new strategies or stop copying a trader at any time.

Investor Login Screen

05 2GATHER Ecosystem

The screenshot displays three overlapping views of the 2gather platform interface, illustrating the '2GATHER Platform Marketplace Model'.

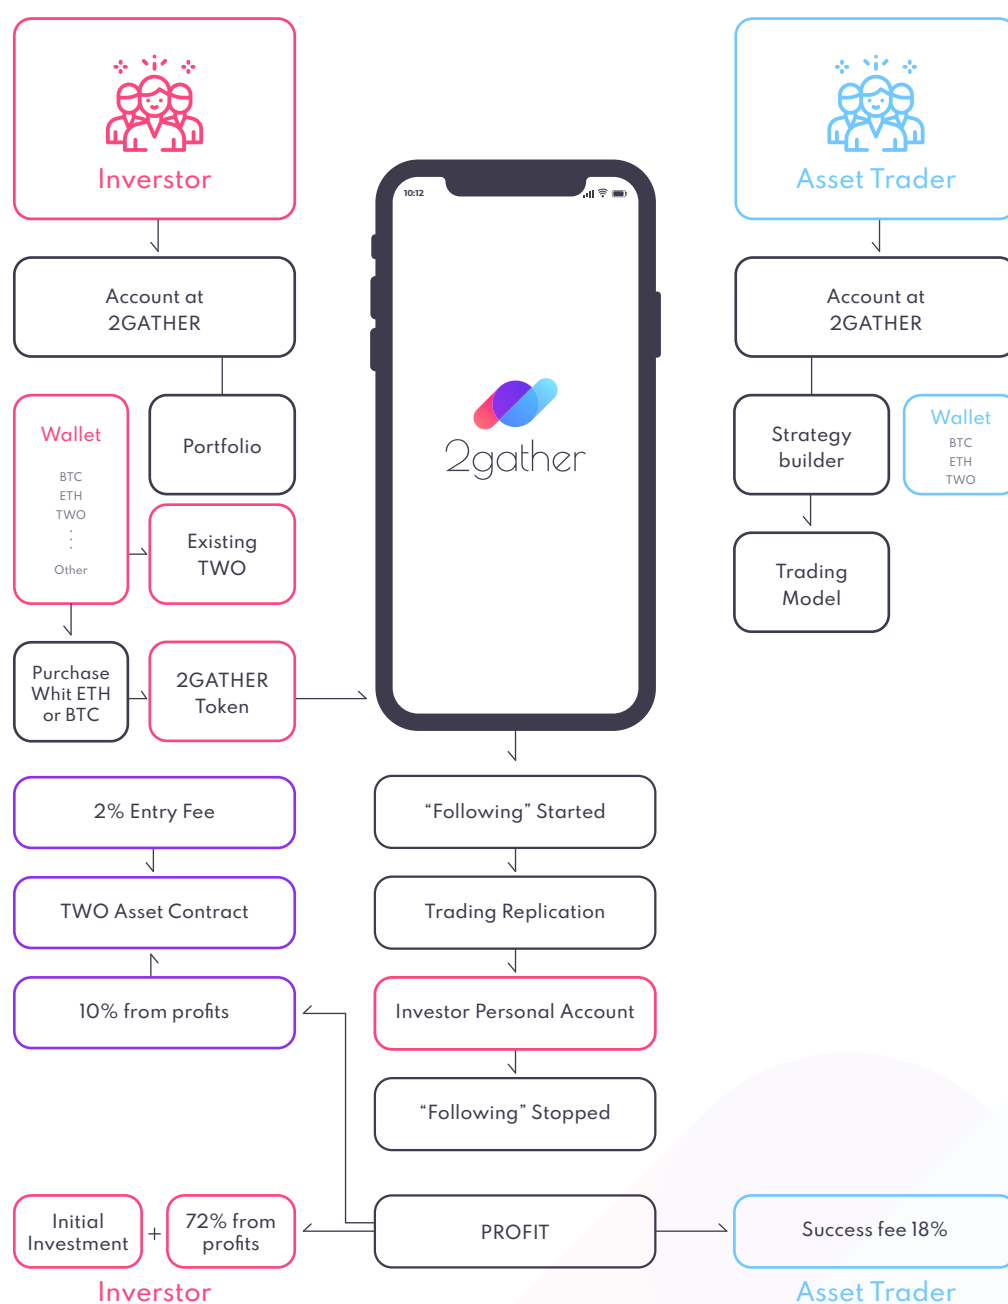

My Page Investor View: This view shows a user's profile (Diana Lee) with a 'Hello Diana' greeting. It includes a sidebar with navigation options: Home, Trade Markets, Traders, My Page, and Logout. The main content area displays trading statistics: Total Sales (\$88,634), Purchase (\$35,625), and Return (\$5,854). A table titled 'Trading Models' lists various cryptocurrencies and their performance metrics, including Price, 1h, 24h, 7d, 24h Volume, and Last 7 Days.

My Page Asset Trader View: This view shows a user's profile (Diana Lee) with a 'Hello Diana' greeting. It includes a sidebar with navigation options: Home, Trade Markets, Traders, My Page, and Logout. The main content area displays trading statistics: 16.37 Trades per Week, 2.5 Avg. Holding Time, 12/12/17 Active Since, and 71.70% Profitable Weeks. It also shows a 'MAX DRAWDOWN' chart and a 'FOLLOW' button with a count of 3506.

Traders Investor View: This view shows a list of traders, including Diana Lee, Hugh Loughton-Scott, Maria Melli, and Maria Rios. Each trader's profile includes a photo, name, return percentage, and a 'Follow' button. The view also includes a 'Trending' section with a list of traders and their performance metrics.

4. Platform Specifications

1. Registration

All users must be registered on the platform to carry out any activities. The users can choose to register through email, or through social media such as Facebook, Google, and Twitter.

2. 2GATHER Account and Wallet:

All users of the platform will have their own unique wallet created automatically. After registration with 2GATHER platform, each user shall have BTC, ETH and other addresses in their wallet. By depositing any of these coins, it is possible to make internal exchanges from one currency to another. However, only TWO tokens can be used for following a trading strategy.

3. Entry fee

There is a 2% entry fee that applies every time a user deposits funds to his or her account. This commission accrues to the TWO Asset Contract increasing the value backing TWO tokens.

4. Model Traders

A Model Trader is a user who created a trading model (strategy) in the 2GATHER platform. From that moment, tracking of all trading activity starts and the model becomes available for following.

5. Investors

The investor is a user who is following a chosen model in order to benefit from the profitable trading of a model trader. Each investor can follow up to 20 different trading strategies at once.

6. Marketplace

The platform allows users to search, rank, filter and compare all of the available trading models.

7. Following a Model

When an investor finds a suitable strategy and starts following – all trading actions of a model will be replicated in their personal 2GATHER account with a proportional amount of funds, predefined by the investor.

05 2GATHER Ecosystem

4. Platform Specifications

8. Segregated Accounts

To provide security and peace of mind to all investors – we offer secure personal accounts for each user within the 2GATHER Platform. None of the funds go directly to model traders, which avoids trust and security issues.

9. Unfollowing the Model

If an investor chooses to unfollow a trading model, funds will immediately be returned to their wallet minus success fees and commission in case of any profit they earned. Each user can stop following a trading model at any time. The only occasion when following stops automatically is when a model trader decides to terminate his or her strategy from the platform. In that case, funds will be returned to all of the followers of the terminated model.

10. Profit Sharing

In case a trading model resulted in profits for the investor-follower, income distribution will look like this:

- a) Success Fee: 18% of all profits will be transferred to the model trader's wallet
 - b) Platform Commission: 10% of all profits and will be automatically credited to TWO Asset Contract
- The remaining 72% shall be credited to the investors wallet along with the initial investment.

11. Anonymous Model

All users of the 2GATHER platform can choose to publish their real names or remain anonymous by using a username. However, we strongly encourage to provide real names, especially for successful model traders, to gain more faith and followers.

12. Users Privacy

No personal user data is available to other users or moderators working on the platform. This list includes but is not limited to: emails, wallet IDs, or funds available to users, as well as direct links to personal social media accounts, even if they are specified in the user's account form. All users can remain completely anonymous.

06 Token

A. Usage

The 2GATHER Token is a smart contract system built on the blockchain, and designed to be used by the 2GATHER platform users. The TWO tokens are easily transferable between users and platforms using compatible wallets and can be smoothly integrated into exchanges.

The platform users can buy TWO tokens as a utility in order to follow one or several trading models that are provided by our platform traders. In the case when the model following results in a profit, the investor will get an initial amount allocated along with all profit converted into TWO, allowing his or her TWO value to increase. The demand for TWO tokens correlate with the copy-trading volume at the 2GATHER platform. The more investors and traders are on the platform, the higher the value of TWO token.

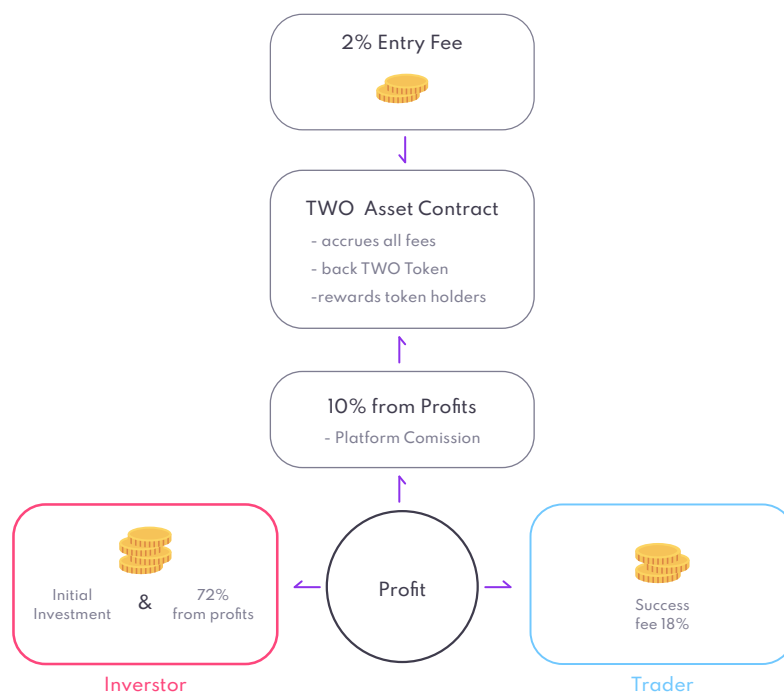

At the initial launch of the 2GATHER platform, we hope to get dozens of professional traders onboard, resulting in early users of the platform to have the opportunity to choose among different trading strategies. As the platform grows, new traders will register their models and more number of strategies will be introduced, thus driving diversification. We believe this will create healthy competition among all model traders.

Successful copy-trading in the platform will achieve many positive outcomes: investors will make a profit, model traders will be rewarded with success fees as well as reputation points, positive reviews, and higher rankings. This will eventually lead to a cycle of attracting more investors to the ecosystem and positively influence the reputation of the 2GATHER platform and the price of the TWO token.

Our aim is to allocate at least 30% of all the platform earnings to systematic buy-back-and-burn programs. This form of repayment program sets best practices for the TWO token economy, and simultaneously serves in the best interest of 2GATHER token holders. "Burning" means that the purchased tokens will be taken off the market, with the consequence that the totalsupply for TWO tokens will decrease. This should effectively improve the value of TWO over time. We will continuously and closely monitor the regulatory environment and possibly introduce alternative methods of value distribution according to market guidelines.

Partners	4%	400,000	Locked for 12 months with 5% unlocked per month
Liquidity	5.6%	560,000	Locked for 12 months with 10% unlocked per month
Cex	17.4%	1,740,000	
Marketing	20.0%	2,000,000	5% unlocked and 5% unlocked per month
Community	1%	100,000	
Totals	100%	10,000,000	

<TWO Token Distribution>

07 Road Map

By continuously adding features, building a strong community and aggregating data, 2GATHER wishes to become a leading blockchain based peer-2-peer asset trading platform for cryptocurrencies.

08 Legal Notices

This whitepaper does not represent a legal relation. The purpose of this whitepaper is to provide information and present the technical aspect of the 2GATHER platform and TWO token. Maximal efforts have been made to make this document contain the true and all the latest information. This document is not professional investment advice and this is not a personal investment recommendation for purchasing TWO token or any other cryptocurrency. Potential investors and buyers of TWO token have to ask for a legal, investment, tax, bookkeeping or any other type of advice for determining potential benefits and possible consequences of actions connected with TWO token.

TWO Token is not aimed to represent securities in any jurisdiction. The crucial role of TWO token and its possible purchase is to be used for providing TWO services. 2GATHER organization bears in mind that the value of TWO token can grow, and TWO token will be used for trading on cryptocurrency markets, but 2GATHER organization does not bear any legal responsibility for loss of value of TWO token. We point out once again that TWO token is not a security, but its purpose is to be used as a means of payment on the 2GATHER platform.

TWO token can have no value and there is no guarantee for the liquidity of TWO token. 2GATHER and its representatives are not and will not be responsible for the market value of TWO token, and/or liquidity of TWO token and/or availability of any market for TWO token through third persons or in any other way.
